

A while ago (2009), the Auto Club Speedway in Fontana California opened it doors and track to members of the Model A Clubs in the region. The event was organized by the Orange County Chapter with help and participation from several other groups as well. I happened to be in the area visiting my brother Rick, so we took advantage of the chance to get his Roadster out for the tour. During the day the Model A's were given the chance to "race" around the *sports car track* at the Speedway. It was a lot of fun, and a good time was had by all. It was the first time we ever had the chance to drive a Model A on a world-class race track. Here are a few photos of the event for your enjoyment.

The day began with loading the Roadster on to the trailer and towing it to Fontana for the day.

Once we arrived and unloaded, we lined up with the rest of the cars to wait our turn on the track.

Finally the call we were all waiting for...gentlemen, start your engines and lineup on the track - the race is about to begin.

And the race is on!

The pit crew ready to head home after a great day.

I hope you enjoyed the tour as much as we did.
