400-A	Murray	400	1931	Convertible Sedan

Model A Body Numbers

Notes:

There are three additions to the body tag chart:

I was e mailed some months ago that "without a doubt" the 140-B Town Car had the same 193 prefix as the 140-A '29 model.

I have also been sent a pic via e mail of a 45-B '30 Briggs Std. Coupe with a prefix of 162.

This confirms Briggs used more than one prefix for 1930. We may never know why this was done or which came first, if either.

It wouldn't make sense to me that Briggs would run these prefixes simultaneously.

The 3rd prefix is a '31 Briggs 229-A Service Truck. Bill Droege noted this in his article in Model A News.

We now have a truck prefix and I hope we may find more later.
