

Authentic Model A Colors in a Spray Can

Submitted by: William "Bill" Brum, Raynham, Massachusetts

Achieving an authentic look is important to many of us who choose to restore our car back to its original condition. In the area of painting, it becomes difficult without the training and equipment of a professional. However, for small items such as interior trim and other metal components, spray cans are a viable option.

Once you have the paint code in hand (acquired from guidance in the **MAFCA Paint & Finish Guide** and the PPG or DuPont customer service group), your local distributor for such popular brands can provide the authentic colors in 12 oz. spray cans. Color matching can also be achieved by providing a good sample (I used the windshield visor) to be analyzed at your distributor by hand held color matching equipment.

The spray cans are typically a single component acrylic enamel providing ease of application, excellent shine and durability. Of course, good paint finish requires proper metal prep regardless of the spray equipment utilized.

The spray can shown below contains the popular Copra Drab for a 1930 coupe utilized to paint the dash panel depicted.
