

Biography of David Gill

Since my youth, I had dreamed about someday driving an antique car across the USA. After some research, I determined that the oldest and best supported vehicle was obviously a Ford Model A! My wife Peggy and I found a great little 1929 Tudor. I either repaired each mechanical component or found a spare and disassembled it so I would know how everything worked and in 2009 we were off!

3½ months and 11,000 miles later, we were home with a pocket full of memories and a lifelong love of Model A's and the people who care for them.

Since then, I have been active with the Sacramento Capitol A's, serving as a board member and two term President. I currently help others with everything from minor mechanical problems to full rebuilds.

I have served as a Restorers class evaluator for several years and was the Chief Evaluator for the 2019 Northern California Regional in Santa Rosa Ca.

I look forward to serving the Restorers Class Committee as well as increasing the number of new evaluators and those interested in having their A's evaluated
