

BIGGER AND BETTER

August 1 - Thanks to the nearly 100 members who participated in the photo resolution survey. We discovered that over 80% of you could see larger photos than we've been posting since 2009 when the web site was redesigned.

So in the future, all photos will be displayed 1111 pixels wide instead of 900 pixels wide. That translates to 15.4" x 11.5" photos. The old size produced an image of 12.5" x 9.25". Most of the current web browsers (Internet Explorer, Firefox, Google Chrome, Safari, etc) will scale a photo that's too large to display in a window so that none of the photo gets cut off. So, hopefully, all of you will now be able to enjoy our web site photos at the largest possible size for your monitors and screens.
