

## Sharp's Model A Truck Goes To Harvest

James thought it would be fun to drive their 31 Model A Truck back to Barton County to take part in the '09 wheat harvest. **James'** grandfather had purchased the truck new, and farmed the ½ section of land where this harvest took place. The land is still in the family.

James reports that the truck performed well under load, but 30-35 mph on the highway was as fast as he wanted to push it. The trip from Derby to Great Bend took 4 hours each way with an intermediate stop for gas. RG

*Combine loads the AA*

*James and his mother, Virginia wait on the combine.*

*70 years of technology. Model A Truck and state of the art grain testing instruments*

*Unloading at the Great Bend Elevator,  
1st load, 70 bushels, 2nd load, 80 bushels*
